

MSB = # digits to right of decimal point in flow rate  
 LSB = flow rate units code, 01 = units/second  
 set to 0x0401

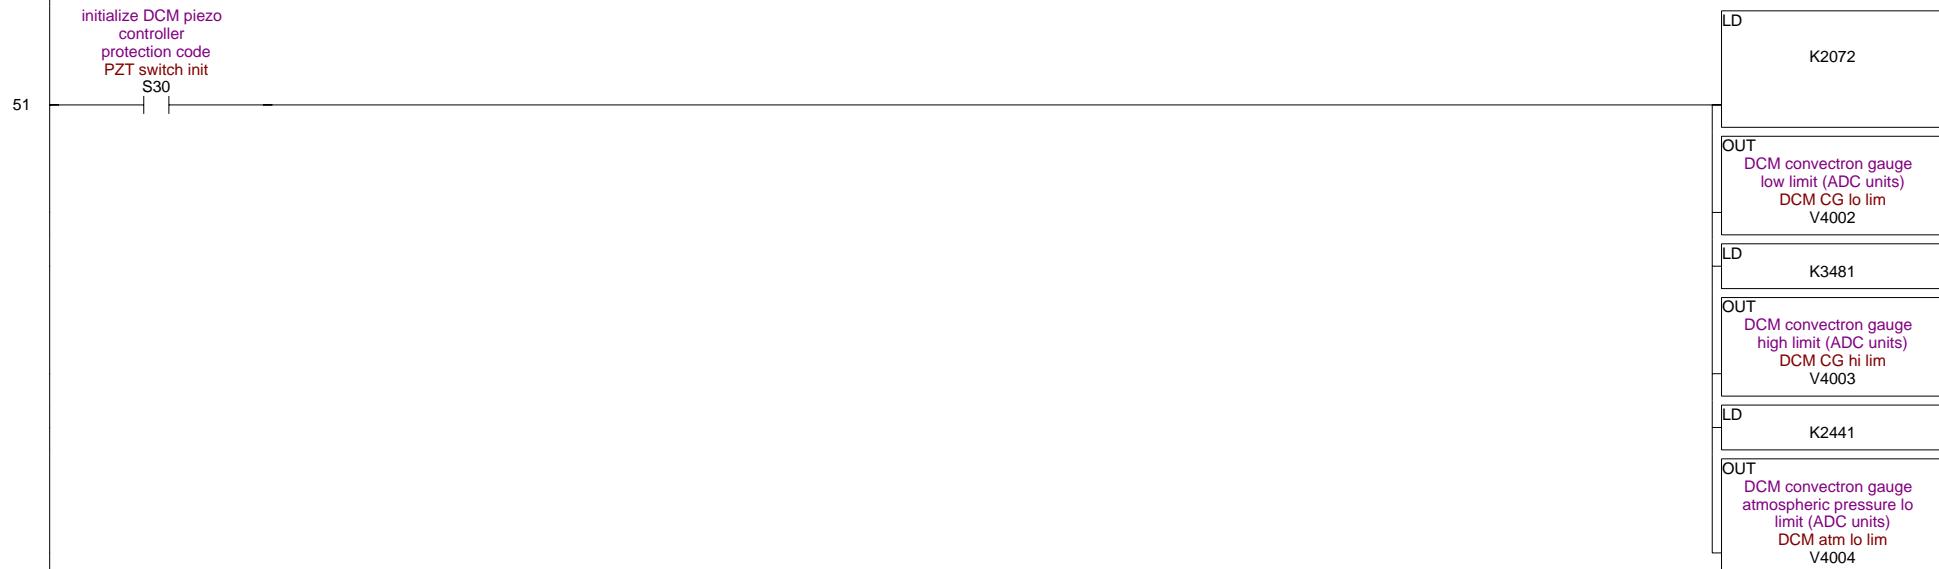

limits for the DCM convection gauge:  
 K2072 = 0.12 VDC = 1.3e-4 Torr  
 K2441 = 1.92 VDC = 8.3e-3 Torr  
 K3481 = 7.00 VDC = 1.0e3 Torr (under vacuum, CG reads ~2.3e-3 Torr)

limits for the DCM ion pump current:  
 K2049 = 0.01 VDC = 4.0e-11 Torr  
 K4093 = 9.99 VDC = 4.1e-8 Torr
